

Adverse Weather - Local Arrangements

If the weather conditions are extreme first thing in the morning and you think the school may be closed, check the messaging service as detailed below. This also includes loss of power - **if there is no power there will be no school.**

If the school is to be closed during the day, you will be informed by phone if possible. Parents of children who walk to school will be expected to make arrangements for them to get home.

There will be a message on the Highland Council Messaging Service regarding a school closure.

The Highland Council number is:

0800 564 2272

The school pin number, which you enter when prompted, is:

04 1960

Please do not leave messages on this service as I cannot access them. This service will be used only for winter emergency school closures.

If the school is open, but transport is not running, children who have privileged transport (i.e. those within recognised walking distance, but are picked up by school transport as there is room on the bus) and can safely walk to school along a pavement should make every effort to do so.
